Patent Claims

Rec'd PTO 24 JAN 2005

10/522349

1. A method for heat dissipation in mobile radio devices having heat-emitting, electrical components (2), in which the heat-emitting components (2) are brought into heat-dissipating contact with a metal foil (5).
5
2. The method as claimed in claim 1, characterized in that the metal foil (5) is corrugated and/or is structured in the form of a honeycomb.
10
3. The method as claimed in claim 1 or 2, characterized in that the metal foil (5) is brought into contact with a heat sink (4).
15
4. The method as claimed in claim 1 or 2, characterized in that the metal foil (5) is itself used as a heat sink.
20
5. A mobile radio device having heat-emitting electrical components (2), in which the components (2) are each in heat-dissipating contact with a metal foil (5).
25
6. The mobile radio device as claimed in claim 5, characterized in that the metal foil (5) is corrugated and/or is structured in the form of a honeycomb.
30
7. The mobile radio device as claimed in claim 5 or 6, characterized
35

- 9 -

in that the metal foil (5) is in heat-dissipating contact with a heat sink (4).

8. The mobile radio device as claimed in claim 5 or
5 6,
characterized
in that the metal foil (5) itself acts as a heat
sink.
- 10 9. Use of a metal foil (5) which is corrugated and/or
is structured in the form of a honeycomb for heat
dissipation from heat-emitting electrical
components (2) in mobile radio devices.
